

A photograph of Karl Popper, an elderly man with white hair, wearing a light blue short-sleeved shirt, sitting on a white plastic chair outdoors. He is leaning forward, writing on a white sheet of paper with a black marker. On the table in front of him are a white coffee cup on a saucer, a black smartphone, and a blue plate with a white cup. The background shows a brick building with windows and some greenery.

Karl Popper and 21st Century Philosophy of Science

12 – 14
June

Karl Popper (1902-1994) is regarded as one of the most influential philosophers of science of the twentieth century. However, Popper's legacy on contemporary philosophy of science is surprisingly thin. This conference aims to revisit and explore Popper's legacy for twenty-first century philosophy of science.

- Featuring 18 talks by leading Popper scholars and philosophers of science from 12 countries across the globe

Contributed Speakers

Nimrod Bar-Am (Sapir College, Israel)

Brian Boyd (University of Auckland, New Zealand)

Francesco Di Iorio (Nankai University, China)

Gal Gerson (University of Haifa, Israel)

Oscar L. González-Castán (Complutense University of Madrid, Spain)

Margaretha Hendrickx (Independent, USA)

Vladimir Kuznetsov (National Academy of Sciences of Ukraine, Ukraine)

Carlos Monteiro (University of Coimbra, Portugal)

Ángeles J. Perona (Complutense University of Madrid, Spain)

Levi Smith (Western Michigan University, USA)

Constantin Stoenescu (University of Bucharest, Romania)

Kei Yoshida (Waseda University, Japan)

Hosted by Division of Humanities, The Hong Kong University of Science and Technology

Sponsored by the Karl Popper Charitable Trust
