Abstract

The purpose of this paper is to analyze the relationships between countries from the perspective of Continental Philosophy. Starting point from the assumption that the workings of the policy makers superpower in maintaining its hegemony visible line between friend and foe countries become blurred. Constellation Postnational included within the scope of Philosophy Continental studies described by Jurgen Habermas, that globalization becomes a political decision indicator is no longer a democratic country, but the media, human rights and inter-state constellation be decisive. In a real democratic state constellation perspectives among countries deemed beyond but determining the direction and the existence of a state. Proven in a study when Indonesia was determined to Renegotiation PT.Freeport Indonesia seemingly Defense Diplomacy work with the United States to send troops to Australia in significant numbers. At the same time, Australian troops insulting Pancasila as a doctrine that is crazy, and PT Freeport Indonesia also threatened the government with submit the matter to international arbitration bodies. However, Indonesia's diplomacy in the era of Jokowi administration did not remain silent to show Indonesia has good relations with China, Saudi Arabia and even Iran and Russia as an enemy of America. Finally PT Freeport fell on the lowest price and finally President Donald Trump sent his vice president to Indonesia and renegotiation with PT Freeport Indonesia was also approved. Therefore it can be concluded that the ethics of diplomacy in the Era of Post National understandable that a government is born and grows from the forces of democracy will be able to build a ethical governance and strong, but still supported by the media and human rights enforcement efforts were good.
