END OF LIFE AND EUTHANASIA - INTERSECTION OF ISSUES AND QUESTIONS

Aim of the conference:

The aim of this event is to relate the philosophical questions of “end of life” and of “life ending”.

During the last decades the issues of euthanasia have been extensively debated from various perspectives, including ethical, philosophical, clinical, legal, psychological, religious, social, economical, and political ones.

Discussing and publication of contemporary views from different countries should contribute to a critical debate on the related issues in ethics and philosophy of medicine.
