

Living in the New Era

Digital Technologies, Creativity, and Science-Fiction

【 26-28 November 2021 】

The conference “*Living in the New Era* 【时代·新生】” (Acronym: *LINE*) aims to explore the world generated by the introduction of new digital technologies through transdisciplinary collaborations between new humanities and science-fiction. This year, *LINE2021* welcomes contributions addressing the role of the body in its relations to digital technologies from researchers and science-fiction novelists working in Italy and China. The international journal *Prometeica* (indexed in A&HCI and SSCI) will publish a special issue based upon the conference papers selected through a blind peer review process.
