Thursday, April 11, 4:30 PM

Alexander Library Teleconference Room

Bernard Stiegler is the founding director of the Institut de Recherche et d'Innovation at the Pompidou Center in Paris, and one of the world's leading philosophers of technology and culture. Author of more than 20 books, Stiegler's thinking reflects on how the technological entanglements of human existence form an irreducible aspect of our lives—past, present, and future.
